25X1A 1. On 29 February 1952, about 60 efficers and man were engaged in record firing with three J5 tanks in the Meisswasser (0 52/A J4) troop training grounds, Four 25, T-31/85 tanks were seen standing there under canwas covers. Record firing was also hold at the AT artillery firing lane, Jeon coupled by two majors and driven by a soldior with red-bordered black opsulets, was seen moving from Weisswass to Camp Nochten. Four T-31/85 tanks stood on the tank firing lane on 6 Larch. Ten officers and about 100 soldiers with 1 light motine guns, submedifine guns, rifler, spades and rucksacks were seen boarding the Cottbus-bound train at the Weisswasser railroad station at 1 p.m. Record firing with 51 tanks was noticed on 7 Larch Reports by tanks, 57 guns and 2 tank chassis were unloaded at the Mcieswasser railrr station on the same day and drove to Casp Nochten, Gunfire was heard from the troop training grounds throughout the day on 10 Narch. Truck coupled by 3 25 officers and 15 men, was seen driving from Weisswasser to Spremborg. Vehicles 25 observed in Canp Hochten All of the soldiers observed there were red-bordered black opsulets. * 25X1A * Comment. The report indicates that, prior to 10 March 1952, record firing with only individual tanks and artillery pieces was held at Jeisswasser. The personnal apparently rotated between the posts and the troop training grounds only for short cycles of record firing. The observations nade in early Larch 1952 therefore still conform with reports received from Jatswasser since December 1971. An increased volume of detraining operations, reported by the same source since the middle of February 1972, indicates that nore components of the 9th Nece Biv wore at Hotswasser in February 1972 than in Jecember 1971 and January 1972.
